

# Contraception Services Information & Fee's

Liverpool Women's Health Centre is committed to delivering high quality reproductive and sexual health services to all members of the community.

As Liverpool Women's Health Centre is a not for profit organisation that relies on self-generated income and government funding to provide services, we charge a low fee for our clinical services.

These fees reflect the specialty service we provide, whilst ensuring all clients have access to our services.

## Contraception Appointment Bookings

Liverpool Women's Health Centre provides contraception options including the removal and insertion of the hormonal IUD and Implanon NXT.

An initial consultation with one of our health professionals is held for you to discuss contraception options, answer any questions you may have, assess your eligibility and complete consent forms. You will also receive a script for your chosen contraception device. This first consult is bulk-billed.

At the time of booking the initial assessment, we will also schedule you a procedure appointment approximately 2 weeks after your initial assessment.

Please ensure that you pick up your contraception device from a pharmacy ready to bring along with you to the procedure appointment. Your procedure appointment may be rescheduled if the practitioner does not think it is safe to go ahead.

## Cancellation Policy

Liverpool Women's Health Centre will send you a reminder SMS message the day before your appointment. Failure to confirm your attendance may result in your appointment being replaced by another client on our waiting list for contraception.

We know things happen or change frequently! If you need to cancel or reschedule your appointment, please let us know, we are more than happy to assist.
